Motion Amplification® Training

To get the best from your RDI Iris M™ Motion Amplification® (MA) system, staff training is essential. OMT has been accredited by RDI to provide Motion Amplification® Certification training. Our instructors are experienced machinery monitoring practitioners, who offer practical, real-world tuition. We have the materials, training aids and facilities to deliver relevant and useable information, whether it be training at an offsite facility or on site.

Overview

The Motion Amplification Certification training is aimed at helping new users of RDI's Iris M™ MA system get an immediate return on implementing the new technology. It covers a variety of topics, ranging from motion visualisation and videography to using the Iris M™ MA technology to complement and enhance machinery and structural diagnostic capabilities.

COURSE CONTENT (Duration 24hrs)

- Introduction to Iris M™ Motion Amplification® (MA)
- Cameras, Lighting and Lenses
- Introduction to Motion Explorer
- RDI Acquisition
- RDI Motion Amplification
- Introduction to Motion Studio
- Maintaining the Motion Explorer Database and Basic Troubleshooting Tips
- MA Lab Sessions
- MA Certification test*

* The MA Certification test is optional for attendees to take at the end of the course if they wish. A Motion Amplification Certificate will be awarded for successfully completing the program and test with a ≥70% pass mark.
